

Power pack type UHMZ 25

WK 560 503

 $p_{max} = 20 \overline{MPa}$

 $Q_{max} = 10 \text{ cm}^3/\text{rev}$

04.2008

APPLICATION

Power pack is intended to supply hydraulic system with hydraulic fluid (oil) according to the required parameters (pressure and displacement).

DESCRIPTION

Power pack in standard consists of the oil tank and the key accessories such as:

- •drain breather filter used also as the oil filler
- •oil level indicator (optical)
- •oil drain plug
- magnetic plug

and of pumping unit (electric motor - gear pump), oil filter (low pressure filter), and also measuring block with pressure gauge switch, pressure gauge and output connections.

Standard version of the power pack can be extended (upon customer request) with:

- •hydraulic control system according to individual scheme;
- other equipment and hydraulic machines, which are not included in the data card, after prior consultation with the manufacturer
- •electric control system

The extension of hydraulic system can be made:

- on the blocks for column mounting (WK560 520) standard version
- •on multi-station manifold blocks type ULRA 6... (WK 450 499)

Power pack is usually used for short - time operation. When the power pack is applied to continuous running under load, outside cooling system must be used.

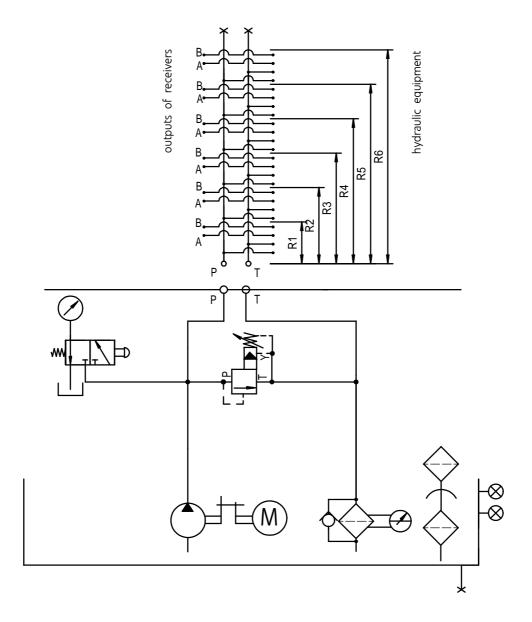

TECHNICAL DATA (table1)

Nominal oil tank capacity	25 dm ³			
Oil capacity difference corresponding to oil level difference max - min	up to 5,6 dm ³			
Hydraulic fluid	mineral oil			
Operating temperature range	- 10 up to + 70 °C			
Standard filtration	16 μm			
Viscosity	$10 \div 380 \text{ mm}^2/\text{s}$			
Motor supply voltage	230/400V 50Hz (other, if agreed)			
Type of pump	10C2,5X053G	10C4,2X053G	10C6,1X053G	20C10X016G
Operating pressure	up to 20 MPa	up to 20 MPa	up to 20 MPa	up to 20 MPa
Displacement	2,5 cm ³ /revolution	4,2 cm ³ /revolution	6,1 cm ³ /revolution	10 cm ³ /revolution

ADDITIONAL

When selecting power pack to the machine it is necessary to consider its total heat balance by specifying oil temperature in the tank – it should not exceed 55°C (328 K).

If necessary, oil cooler must be used for the hydraulic system. Thermal power output of the power pack tank to the environment can be estimated using below formula or diagram.

$$N_{output} = k \times A \times \Delta T$$

 $\mathbf{N}_{\text{output}}$ $\left[\ W \ \right]$ - thermal power output of the tank

A $[m^2]$ - active surface area of the tank for the power pack tank UHMZ 25 $A = 0.75 \text{ m}^2$

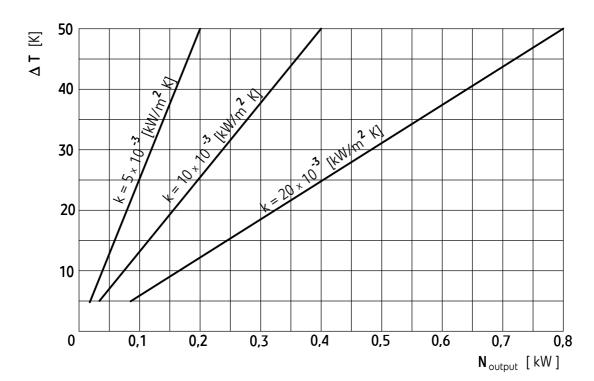

k $[W/m^2 \times K]$ - heat exchange factor

• k = 5 W/m² x K - when poor air circulation, unfavourable location,

• $k = 10 \text{ W/m}^2 \times \text{K}$ - normal air circulation from all directions,

• $k = 20 \text{ W/m}^2 \times \text{K}$ - when intensive air circulation (unnaturally forced),

ΔT [K] - temperature difference between the tank (oil) and the environment

Thermal power output of the power pack tank UHMZ 25

HOW TO ORDER Any order should be addressed to the manufacturer according to the below coding. **UHMZ** 25 **Tank capacity** 25 dm^{3} = 25Type of pump 10C2,5X053G = 2.510C4,2X053G = 4,210C6,1X053G = 6.120C10X016G = 10**Motor power** (according to the table 3) 0,55 kW = 0.550,75 kW = 0.751,1 kW = 1,1 1,5 kW = 1,5 2.2 kW = 2.2Nominal size of hydraulic elements mounted (referred to connections of directional valves) = 6 **Designed version** • standard version (without connection for directional valve) = no designation • with the connection for one directional valve = R1• with the connection for two directional valves (parallel connection of apparatus) = R2• with the connection for three directional valves (parallel connection of apparatus) = R3• with the connection for four directional valves (parallel connection of apparatus) = R4•with the connection for five directional valves (parallel connection of apparatus) = R5•with the connection for six directional valves (parallel connection of apparatus) = R6Successive number of power pack version (given by the manufacturer of the power pack when order confirmed) = XXXXFurther requirements in clear text

Coding example: UHMZ 25- 4-0,75-6-R3-XXXX

(to be agreed with the manufacturer)

NOTE:

Type, quantity and placing hydraulic equipment (directional valves, valves and other), must be specified in the hydraulic scheme or in another clear way.

Below hydraulic equipment manufactured by "PONAR-WADOWICE" S.A. that can be used for control systems $\ \,$ (table 5)

Directional spool valve, electrically operated	WE 6	according to WK 499 502	
Directional spool valve, hydraulically operated	WH 6	according to WK 420 170	
Directional spool valve, hand lever operated	WMM 6	according to WK 420 170	
Directional spool valve, rotary knob operated	WMD 6	according to WK 420 170	
Pressure reducing valves, sandwich plate	UZRC 6	according to WK 493 061	
Pressure sequence valves, sandwich plate	UZKC 6	according to WK 393 060	
Check valves, sandwich plate	WZZC 6	according to WK 450 355	
Double check valves, pilot operated	Z2S 6	according to WK 450 360	
Double check valves, sandwich plate	Z2FS 6	according to WK 450 232	
Pressure switches (with subplate UŁBC 6)	USPH 4	according to WK 450 398	
Pressure relief valves	UZPR 6	according to WK 494 060
